### SUMMARY

Software Engineer with experience in Python backend development, specializing in Django, FastAPI, and scalable API design. Experienced in building AI-powered features and backend systems. Focused on writing clean, efficient code and solving real-world problems. A collaborative team player with a strong interest in continuous learning and applying modern technologies.

### EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                       |
